

e - Networking

NEMO SA School Project:

The NEMO SA team would like to start and pilot a project at schools starting with grade 1- 3 children. The project will take place in a manner that children will participate in the talk. The session will be interactive.

Once children begin to understand the concept of time they will realise how important it is and how important it is to **respect** a person's time. Teaching very basic principles of respect and arriving at school on time etc.

We will be putting together a talk and will present at schools starting in the Atlantis Community.

I certainly remember how proud i was when i received my first watch as a present from my parents.

Our intention is to hand out a watch to each child and teach them the importance of basic manners, like please and thank you, which is the basic value of **appreciation**.

We trust that all parties who listen to this talk will gain value from the project.

The school will get a listing on the youth and education category and will get a link to this category and this will make them an **e** – Networking partner with NEMO SA and therefore be affiliated with us.

'TOGETHER IN UNITY WE MAKE A DIFFERENCE'

Our aim is to empower unemployed teachers to take on this project part time and be able to generate and income for themselves. Get paid to go out and do the talk at the schools.

PS We are looking for companies and individuals who would like to get involved with this initiative and who can sponsor watches. They will also become **e** - Networking partners with NEMO SA in the process.
